

Premium Service

Talksoft can communicate with your patients via
Phone, Text, Email and App

Talksoft customers with Premium Service see **double the response rate** of phone-only customers.

Premium Service

Flexible Set Up

Customizable settings allow you to choose when and how your patients or customers are reminded. Reminders can be sent via phone, text, email, and app in the order you prefer.

Interactive and Dynamic

Our messaging is coordinated and knows when your patients respond. Because the methods work together, we can cancel subsequent reminders if the patient confirms.

Advanced Technology

Our free, patent-pending, Talksoft Connect app puts the appointment information directly in the hands of your patients and gives them access to information on the go.

Personalized

All methods of communication are personalized for your office, from the voice that is spoken during the call, to the look and feel of your email reminders.

Enable efficient communication.
